

About Us

TRONIC.LK is an electronic component and module sourcing company under Sigma Electronics (Pvt) Ltd. We supply high quality electronic components, modules and tools manufactured in China, Taiwan, Hong Kong, Japan, USA, Italy, England, Germany and Australia. Being electronic hobbyists, we strive to provide high-quality modules and components at a reasonable price.

We currently supply Arduinos, Raspberry Pis, Orange Pis, Micro:bits, NodeMCUs, Atmel & Microchip microcontrollers, ICs & other passive components, Creality 3D Printers & filaments, Pneumatic parts, CNC accessories, Inverters, Battery chargers, Multimeters, Ronix Tools, etc...

We were the first to introduce Arduino development boards and modules to Sri Lanka way back in 2011 under the company named Lankatronics (Pvt) Ltd., which later evolved into TRONIC.LK.

Today, TRONIC.LK is one of the leading electronic stores in Sri Lanka. In our clientele, we have all the leading universities, technology institutes, R&D companies, Military, Garments, etc...

Mission: Introduce High Quality Components to Local Market

Vision: Become the Market Leader in High Quality Component Sourcing
